A Message from our Executive Sponsor

DANIELLE ZIERNICKI, BS, PHARM D, RPH
Global Head, Regulatory Policy & Intelligence

Thank you for your interest in the BeiGene Global Regulatory Affairs PharmD Fellowship. At BeiGene, we truly believe that cancer has no borders, and neither should we. Our diligence to provide transformational medicines to improve the ways cancer can be confronted, with ambitious strategies to focus on global access, is distinctive from other organizations - putting patients everywhere at the forefront of our minds exemplifying one of our core values. We believe our scientific advances in medicine evidenced by our innovative pipeline along with our diverse, cross-cultural, and knowledgeable colleagues provide unique opportunities for prospective talent. With a distinctive portfolio and pipeline of therapies expanding across solid tumor, hematology oncology, and immunology and inflammation, BeiGene is an emerging pharmaceutical industry leader.

As a pharmacist, when creating this fellowship, it was my goal to create a program that utilizes and builds upon the skillset students gain during the PharmD curriculum. The BeiGene Regulatory Affairs PharmD Fellowship is designed to provide PharmD graduates with an array of learning experiences, obtained through a holistic program, where strong expertise can be achieved while working cross-functionally throughout the organization. With experienced mentors serving as preceptors, our priority is developing our fellows' skills and capabilities to succeed in the industry. We look forward to sharing our commitment to fellow development and building the future pipeline of regulatory professionals.

Our best wishes are with you as you embark on this next phase of your career.

Danielle Ziernicki, BS, PharmD, RPh
Global Head, Regulatory Policy and Intelligence
Fellowship Director, BeiGene Global Regulatory Affairs PharmD Fellowship

OUR FOUNDERS

“BeiGene started when a visionary American entrepreneur and a preeminent Chinese-American scholar-scientist united to leverage worldwide talent, expertise, and resources to benefit patients with cancer — wherever they live.

Today, we are continually expanding and improving our capabilities to bring — alone and through collaborations — innovative medicines of the highest quality to as many patients as possible via a unique development strategy that supports global accessibility.”

About BeiGene

Fellowship Steering
Committee

Fellowship Overview

Application Process

The BeiGene Global Regulatory Affairs Fellowship is a one-year rotational program. By working in multiple different sectors of the Regulatory Affairs Department, the fellow will gain a holistic understanding of the regulatory field and gain robust foundational knowledge to accelerate the start of their career. **The fellowship will be conducted remotely beginning July 2023.**

The core components of the fellowship program are:

Regulatory Policy and Intelligence

- The policy and intelligence team analyzes and presents the latest in health authority regulatory trends, policy initiatives, and approvals across therapeutic areas.
- The fellow will learn how timely and thorough analysis of the nuances of regulatory precedent is essential to successful drug development.

Regulatory Affairs, Strategy

- The regulatory strategy team plans and coordinates regulatory submissions and provides guidance to the cross-functional development teams on regulatory strategy and tactics.
- The fellow will support the regulatory affairs lead(s) with developing and implementing strategies for optimal regulatory development of assigned projects.

Regulatory Affairs, Advertisement and Promotion

- The regulatory advertising and promotion team administers the promotional review process, prepares FDA submissions for promotional materials, and provides regulatory review and oversight for promotional and non-promotional product communications.
- The fellow will learn about regulatory requirements for promotion and other product related communications.

Regulatory Affairs, Labeling

- The labeling team develops and maintains global core labeling for commercial products, and provides regulatory support for local labeling development and implementation.
- The fellow will learn about regulatory labeling strategy and operations, and support activities for management and governance of global and local product labeling.

Eligibility and Qualifications

Fellows will be selected on a nationally competitive basis. This fellowship offers a competitive salary and benefits package.

About BeiGene

Fellowship Steering Committee

Fellowship Overview

Application Process

Eligibility

- Have earned a Doctor of Pharmacy degree (PharmD) from an ACPE accredited college of pharmacy at the commencement of the program (July 2023).
- Authorized to work in the US without BeiGene sponsorship.

Qualifications

- Excellent written and verbal communication skills
 - Ability to work efficiently in a remote environment
- Ability to understand, analyze, and apply clinical and medical information
- Ability to work independently and proactively
- Ability to work collaboratively within a cross-cultural team and build effective partnerships
- Flexible, adaptable, and able to work efficiently
- Analytical – ability to logically break down scenarios, carry out diagnostics, and develop solutions
- Strong organizational and project management skills with a high level of attention to detail and time management skills
- Commitment to integrity and high standards in self and peers

How to Apply

- Email application materials to GlobalRAFellowship@beigene.com.
- **Application Requirements:**
 - Letter of Intent (LOI)
