

Fellowship Overview

This 2-year PharmD Post-Doctoral Fellowship offers PharmD graduates the opportunity to understand market access, informatics and communication of evidence to decision makers to prepare the fellows for a successful consulting, academic, or biopharmaceutical career. The fellows will work directly with mentors in the Eshelman School of Pharmacy and AESARA, a leading health outcomes, market access consulting company. This fellowship is contingently slated to start on July 1st, 2023. There will be two positions available.

During the first year, the fellows will spend 50% of their time with the Divisions of Practice Advancement and Clinical Education (PACE) and Pharmaceutical Outcomes and Policy (DPOP) faculty at UNC. Here the fellows will work with faculty of DPOP and PACE where they will be exposed to how outcomes methodology and informatics can be used to answer a variety of research questions. The other 50% of the time will be spent working with AESARA staff where they will gain exposure to market access consulting through a wide array of therapeutic areas and pharmaceutical clients.

During the second year of the program, fellows will spend the majority (80%) of time working with AESARA staff, with increased responsibility and an emphasis on client interaction and project management. They will continue interactions with UNC faculty and complete any ongoing projects.

The fellows will develop behaviors and competencies needed to be successful in consulting, managed care and the biopharmaceutical industry. This includes exposure to the application and communication of health economics and outcomes evidence relevant to biopharma. The skills developed during these two years will position the fellows to effectively communicate evidence generated directly to decision makers as well as thoroughly understand the process and strategy behind evidence generation.

Masters of Science in Biomedical and Health Informatics

The fellows will have the opportunity to take graduate level coursework and pursue a professional Master of Science degree in Biomedical and Health Informatics. This online UNC program adds the flexibility of pursuing a master's degree while taking part in a full-time fellowship program. Visit chip.unc.edu for more information.

Program Highlights

Exposure to HEOR/MA strategies across multiple therapeutic areas

Experience in US/Global reimbursement environment

Develop a working knowledge of economic model development

Understand various study methodologies to answer research questions

Effectively work within a matrix environment

Application Details

Required materials:

- CV
- Personal statement
- Unofficial transcript
- 3 letters of recommendation

Application Deadline:

October 15th, 2022

Please send application to stacey_mcglothlin@unc.edu.

Transcript and letters of recommendation can be submitted after October 15th but are required prior to final interviews

Early applications are encouraged

University of North Carolina and AESARA Market Access and Informatics Fellowship

AESARA

AESARA is a cutting-edge market access consulting firm that specializes in creating dynamic solutions for the Life Science industry by integrating technology with strategic consulting for impactful results. We provide actionable insights and deliver results that align with HEOR/MA strategies for small biotech to

large pharmaceutical companies. AESARA contains three working groups (strategic consulting, evidence institute, and digital solutions) where the fellows will have opportunities to be mentored and see first-hand the impact that creative solutions in HEOR and MA can have on industry clients.

UNC Eshelman School of Pharmacy

At the UNC Eshelman School of Pharmacy, everything we do begins and ends with a patient in mind. We are preparing the next generation of scientists, clinicians and practitioners to discover solutions to the world's most challenging health care issues. Throughout our history, the School has built a reputation for cutting edge research, rigorous training programs, and outstanding faculty, staff, and students. A world-class university, a model Area Health Education Center (AHEC) system, an award-winning

hospital system, and an international center for pharmaceutical research and development, and proximity to the Research Triangle Park, creates one of the most dynamic centers of learning in the nation. The School is one of five health affairs schools on the campus of the University of North Carolina at Chapel Hill and benefits from close collaborations with many on-campus research programs, including the Carolina Center for Genome Sciences, the Lineberger Comprehensive Cancer

Center, the Center for Infectious Diseases, and the McAllister Heart Institute. The School is the number one ranked pharmacy program based on the U.S. News & World Report ranking and is one of the leaders among schools of pharmacy in research funding.

Co-Director within UNC
Sachiko Ozawa, PhD, MHS
Associate Professor-PACE

Co-Director within UNC
Amanda Seyerle, PhD, MSPH
Assistant Professor-DPOP

Second-Year Fellow
Anthony Hudzik, PharmD
University of Texas College of Pharmacy

First-Year Fellow
Denise Garner, PharmD
University of Wisconsin School of Pharmacy

First-Year Fellow
Ashik Jayakumar, PharmD
University of Illinois Chicago College of Pharmacy
